

Alexandros Palaiologos Bio - Mexico - 2016 INFINITI Academy Engineer

Region: Mexico

Name: Alexandros Palaiologos

Age: 23

University: Tecnológico de Monterrey

Degree: Automotive Engineering

From: Mexico City

Alexandros will be returning to the Tecnológico de Monterrey University following both of his respective placements at INFINITI Technical Center and Renault Sport Formula One™ Team. He is hoping to continue his career in the Renault Sport Formula One Team after finishing his studies. He has had a passion for automotive and motorsport since he was 8 years old and looks forward to gaining experience over the year. He has previously worked with GT1 race cars and in Formula Mazda single seaters.

What is it about automotive and motorsport projects that ignites your engineering passion?

The fast pace and quick decision making you need to apply. Also the level of technological development.

On a more personal basis, internal combustion engines and turbochargers ignited my passion when I was a child and I always loved the sounds cars make while accelerating.

What has struck you from a personal and engineering point of view since you began your placement at INFINITI / Renault Sport Formula One Team?

The way information is developed, stored and is readily available for all engineers to develop new products has amazed me. I think I would spend my whole life investigating just 10 per cent of what they have in their database.

Where do you see yourself in 10 years?

I see myself as the technical director of a F1 team.

Biggest positive impact in life?

My uncle, he pushed me to come to Mexico and change my life.

Most looking forward to about living/working in the UK?

The extensive racing industry in the UK.

Greatest strength?

I am passionate about my career.
